

Repeaters Take a Bite Out of Telecom Costs

Hundreds of Emendee clients have benefited from lower utility expenses over the years. For telecom expenses, this has been done in many different ways:

- 1) Negotiating better rates & more efficient services with current providers
- 2) Shopping for and implementing alternative providers
- 3) Removing services that are no longer needed
- 4) Installing a Hosted Phone System

More recently, some Emendee clients with multiple locations nearby each other have benefited from a wireless building-to-building solution. Previously, each building required its own Internet account, which led to a higher monthly cost. Now, thousands of dollars are being saved with this very simple & reliable solution, which only requires one account. Find out if you're a good candidate for repeaters!

Wheeler Installs a State-of-the-Art EV Charging Station

Wheeler is a full-service healthcare agency, with locations across CT, including two brand new locations in Bristol & New Britain. As they continue to expand to meet the needs of their growing clientele, they were looking for an Electric Vehicle Fast Charger (known as a Level 3 charger) for their New Britain location. This type of charger can charge an electric vehicle to 80% capacity in less than an hour.

Todd Raymond, V.P. of Facilities at Wheeler reached out to Emendee Tech to look into the various options. A Charge-Point solution became the charger of choice. Although the timeline was longer than expected due to supply-chain issues, it was recently installed & activated.

According to Todd, "Integrating EV chargers into our organizational infrastructure signifies a proactive approach towards sustainability, innovation, and employee satisfaction, ultimately contributing to long term success. I would like to thank Dave Pestillo from Emendee Tech for his technical expertise and guidance through the entire process. Wheeler anticipates expanding the installation of EV charging stations at its other health and wellness centers in the near future."
